## Laser PIN

### *The safe solution for sending secret numbers*

The increase of fraud in the use of credit cards requires effective measures to ensure the security of personal data. Due to this, and in order to solve it, Impaorsa offers two new media designed to hide any confidential information that your company needs in one single document.

With this technology for issuing the PIN using laser printing, Impaorsa is positioned at the forefront worldwide in developing new security solutions.

### What is its scope of application?

- Sending PINs for the financial and telecommunications industries.
- PINs for the security industry (alarms, etc).
- PAwards, promotions, contests and sweepstakes.
- Passwords to access any service.
