PIN FISCODE

A good alternative for the concealment of data

Impaorsa offers this new system for the secure transmission of confidential information for PIN numbers, validation codes and other confidential data for which integrity is of vital importance.

The FISCODE application provides the user with a simple form of comprehensive security that enables the immediate detection of any tampering.

[CLOSE X](#)

The I-Code application provides the user with a simple form of comprehensive security that enables the immediate detection of any tampering.

Advantages

- Subjected to the PACS security test.
- Very simple system for obtaining the PIN.
- Comprehensive security that allows the immediate detection of any tampering.
