IMPAORSA participates for the second consecutive year at Meet Innov Connecting Innovation

On November 8, 2011, attended the convention Impaorsa Innovation more important in the Paris region.

Friday, November 11, 2011

The French capital became the European epicenter of innovation networking in one day. Meet Innov is an international business meeting dedicated entirely to innovative companies and organizations associated with the world of innovation where participants have the opportunity to attend a full program of conferences that addressed the process of innovation, as well as offering the possibility of business with other participants in the one-to-one meetings.

Around 500 participants had the opportunity to participate in conferences, workshops, and above all, meet other participants in the B2B meetings.

Impaorsa, once again, in its commitment to R + D + I, has participated in this international forum for innovation. More than two years ago Impaorsa provides Research, Development and Innovation, as a cornerstone to the success of your business, highlighting highly innovative products in printing such as: integrated bracelet, PIN I-CODE, the distinctive vehicles or documents with NFC and RFID technology.
