RFID recording

Pioneers in the development of documents with RFID/NFC

Thanks to the leading-edge technology, machinery and specialisation at our disposal, we have the capacity to produce long and short runs.

What sets us apart

- We are pioneers in the development of documents with RFID and NFC.
- Our four years of experience guarantee our work with RFID and NFC recording.

What we offer

- Thanks to the high-tech equipment and expertise at our disposal, we have a production capacity for large and small runs.
- Because of our commitment to investment in R+D+I, we can provide the entire service: from the insertion of the RFID/NFC chip into the document to the recording of the same chip. This also allows us to record quickly and safely in order to detect any chip that is in a poor condition.
- We have a verification reader in the inlay machine which allows us to check the condition and operation of the chips provided.

Types of recording systems

- HF recording.
- UHF recording.
- NFC recording.

Applications

- Letter with vehicle badges.
- Letter with library self-check out identification cards.
- Access-control badges, in a letter, flyer, A5, etc.
- Healthcare identification wristbands for laser and thermal transfer printers.
- Documents or advertising campaigns with NFC mobile marketing..
- Management of documents, pages, subfolders, etc. (notaries, courts, law firms, exams, etc).
- Transport and tourist cards in a letter, leaflet, brochure, etc.
- Sporting event control (RFID on uniforms and RFID wristbands).
- Traceability.
